

A BARCODE SOLUTION  
DESIGNED FOR THE HANSEN® STOCKROOM

Accurate Warehouse Data / Efficient Data Entry

JMT Systems presents

Falcon Automation™ for Hansen®

## Falcon™ for Hansen®

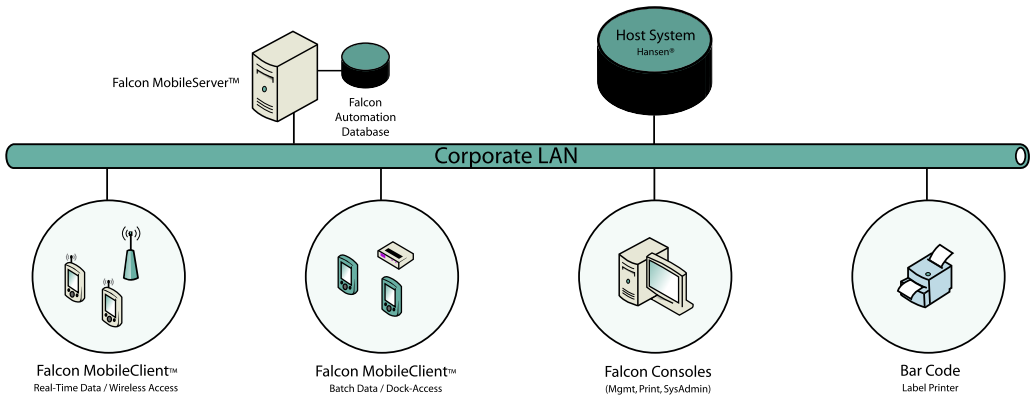

Falcon Automation™ for Hansen® combines the efficiency and accuracy of mobile barcode data collection with the stability and power of Hansen®. Falcon Automation works with all kinds of data tracking applications, from warehouse inventory to water quality recording.

## Professionals in mobile and barcode technology.

You asked for a barcoding solution for your Hansen® warehouse and here it is. JMT has worked with Hansen and its customers since 1999. Our Falcon Automation™ for Hansen® interface has proven itself in the hands of actual Hansen users.

JMT's Falcon Automation provides mobile real-time data collection and barcode labeling which integrates seamlessly with Hansen and other host systems. Implement Falcon Automation for Hansen today and your hand-written notes, duplicate data entry and out-of-date data become a problem of the past.

Now you can take Hansen transactions such as Receipts, Issues, Transfers, Adjustments and Audits into the warehouse or parts yard using mobile computers. The collected transactions are posted real-time directly into Hansen. If Hansen, or any host system, provides additional functionality that you desire to have in the hands of your mobile workforce, JMT's Falcon Automation can make that happen as well.

Falcon Automation is a robust system which is easy to use and allows for data collection that is timely, accurate and efficient. Please visit the web site or call us for more information.

*"Throughout the project, you understood our financial concerns, our software needs, as well as our time restraints and needs. Your planning and communication skills kept the project on track and your constructive input was greatly appreciated. Your willingness to provide continued support and the technical competence of you and your staff speaks volumes about your professionalism and the integrity of your company."* - **City of Boise, Idaho**
