Ellensburg, WA 98926

Mike Bosko and Team,

We would like to thank you for the continued and consistent products that your team develops and support. Pierce County Public Works and Utilities is a fast growing department that wanted to capture live costing for multiple store rooms and a demanding asset management process. JMT Systems Consulting in conjunction with Hansen Information Technologies (now Infor Corp.) teamed up to develop and implement a robust barcode inventory system that is easy to use. We appreciate the flexibility of your product with the wireless connection that instantly validates multiple transactions with our live Oracle data base and automatically batches the data on the scanner when wireless is not available.

The relationship and trust that you and your team developed with our users and core integrators made the project a complete success.

Thank you for the personal touch and excellent support!

A handwritten signature in black ink, appearing to read "Larry Butner".

Larry Butner
